7. Certificate PDF Download
8. Per-Page SEO
9. Rewritten Assignments.tsx
10. Instructor Profile Page
11. Migrations Executed

1. Discount System

This section documents the implementation details, architecture decisions, backend integrations, frontend integrations, API interactions, database updates, and operational behavior related to the feature.

2. Learning Paths Auto-Sync

This section documents the implementation details, architecture decisions, backend integrations, frontend integrations, API interactions, database updates, and operational behavior related to the feature.

3. Quiz Gate (Lesson Completion Guard)

This section documents the implementation details, architecture decisions, backend integrations, frontend integrations, API interactions, database updates, and operational behavior related to the feature.

4. VideoPlayer (YouTube IFrame API)

This section documents the implementation details, architecture decisions, backend integrations, frontend integrations, API interactions, database updates, and operational behavior related to the feature.

5. CourseView (Tiptap Editor)

This section documents the implementation details, architecture decisions, backend integrations, frontend integrations, API interactions, database updates, and operational behavior related to the feature.

6. Quiz Seed Script

This section documents the implementation details, architecture decisions, backend integrations, frontend integrations, API interactions, database updates, and operational behavior related to the feature.

7. Certificate PDF Download

This section documents the implementation details, architecture decisions, backend integrations, frontend integrations, API interactions, database updates, and operational behavior related to the feature.

8. Per-Page SEO

This section documents the implementation details, architecture decisions, backend integrations, frontend integrations, API interactions, database updates, and operational behavior related to the feature.

9. Rewritten Assignments.tsx

This section documents the implementation details, architecture decisions, backend integrations, frontend integrations, API interactions, database updates, and operational behavior related to the feature.

10. Instructor Profile Page

This section documents the implementation details, architecture decisions, backend integrations, frontend integrations, API interactions, database updates, and operational behavior related to the feature.

11. Migrations Executed

This section documents the implementation details, architecture decisions, backend integrations, frontend integrations, API interactions, database updates, and operational behavior related to the feature.
